# OSHA FOR HAZARD CONTROL TECHNOLOGIES LTD

**Preamble**

Occupational Safety and Health (OSH) is concerned with protecting the safety, health and welfare of people engaged in work or employment.

Occupational Safety and Health Administration (OSHA) sets and enforces protective workplace safety and health standards. It provides information, training and assistance to employees.

Employers ensure responsibility for providing a safe and healthful work place whereby employees are fine at the place of work, free from injuries or work-related diseases or illnesses.

# OCCUPATIONAL SAFETY AND HEALTH POLICY GUIDELINES FOR Hazard control technologies ltd

**Our Commitment**

Hazard Control Technologies LTD is committed to protecting employees and other stakeholders involved in the company.

Employers ensure responsibility of these practices and are guided by the OSHA act on provision for the safety, health and welfare of workers and all persons lawfully present at work places.

**Goal**

The overall goal of occupational safety and health programs is fostering a safe and healthy work environment with high standards.

**Objectives**

The main **objectives** include-

1) To protect workers' health by preventing and controlling occupational diseases and accidents;
2) To enhance physical, mental and social well-being of workers;
3) To enable workers to conduct socially and economically productive lives, and to, contribute positively to sustainable development.

**Purpose**

The main purposes of the policy are to:

1. To secure the safety, health and welfare of persons at work
2. To protect persons other than persons at work against risks to safety and health in connection with the activities of persons at work.

**Scope**

The OSH policy guideline should primarily provide guidance to:

1) All employees working at Hazard Control Technologies LTD and all its branches
2) Clients, contractors, and visitors of Hazard Control Technologies LTD

The policy provides a framework for implementing safe and healthy work practices and procedures for all staff. It also provides risk assessments guidance and tools for use in company that will ensure compliance by setting and enforcing standards, which are shared by clients, visitors and all stakeholders of Hazard Control Technologies Ltd.

The policy provides a culture of safe and healthy attitudes and practices in individuals which involves continuous educational programs and on the job training.

The policy aims at-

(a) Preventing or reducing occurrence of accidents, work-related injuries, and work place hazards.
(b) Reducing loss of employee days arising from job related disabilities
(c) Preventing and reducing the contraction of occupational diseases.
(d) Improving the working environment of the workers, in order to, improve employee relations.
(e) Improving the psychological contract – expectations of employees are met
(f) Reducing loss of wages and medical expenses for the employees.

**The Safety and Health Committee**

The company will establish a safety committee with representatives from management to the junior staff.

The responsibility of this committee will be identifying hazards and unsafe work practices, removing obstacles to accident prevention and helping evaluate the company's effort to achieve and accident-and-injury free work place.

The duty of the committee will also be to carry out quarterly inspections of the premises and to hold quarterly OSH meetings with clearly documented meeting minutes as well as give recommendations to the management.

All employees will have roles and responsibilities attached to them to ensure complete implementation and continuous compliance of the policy.

## ROLES AND RESPONSIBILITIES

**The Management:**

a) To ensure that the Occupational Safety and Health Policy; that is the Statement, the company and employee responsibilities and other arrangements concerning the health, safety and welfare of all members of staff, clients, visitors are made known and implemented.
b) To ensure safe systems of work are designed where hazards are identified and implemented. A review should be carried out periodically.
c) To ensure that all safety instructions, training and retraining is carried out periodically.
d) To participate in consultation with members of staff or their Occupational Safety and Health representatives on matters of health and safety in accordance with agreed procedures;
e) To ensure that regular inspections and audits are carried out;
f) To investigate all accidents, incidents or near misses concerning health and safety with the view to identifying the cause(s) and preventing a recurrence;
g) To respond to requests for information from Safety and Health representatives in accordance with statutory requirements;
h) To be proactive in showing interest and enthusiasm for environment, health and safety by demonstrating their personal concern for health and safety at the workplace.

**The Employee**

a) To ensure their safety and health, and that of persons who may be affected by their act of commission or omission.

b) To co-operate with the employer and co-workers in their workplace to achieve safe and healthy work environment by following OSH policy guidelines and standard operating procedures.

c) To report **ALL** Accidents, no matter how slight - this allows for prompt medical attention, and investigation and elimination of the cause that may place others in harm's way.

d) To report to the supervisor of possible hazards, any accidents, injuries, or near misses that arise in the work place. If an urgent action is required, the situation must be reported and information forwarded to the appropriate department as soon as possible fatal accidents or anything as serious should be reported immediately.

e) To inform the supervisor of any personal condition that may increase vulnerability of occupational hazards

All employees should ensure they do not remove, interfere with, or misuse anything provided in the interest of health and safety.

**The provisions of the policy**

The OSHA at Hazard control technologies LTD contains the following provisions: -

1. **Safety and general provisions**

   Focus is placed on safety and efforts should be in place to ensure employees and other visitors are not injured through issues such as storage, ladders, Ergonomics at the workplace, fire prevention and Fire Protection which involves Fire extinguishers charged and identified; No Smoking signs posted; etc.

2. **Health – general provisions**

   This sets out details for provisions or ensuring that the workplace is a healthy place to work in. The issues related are cleanliness, overcrowding, housekeeping and sanitation - General neatness and tidiness; adequate lighting, Waste containers provided and used sanitary facilities convenient, adequate and clean, adequate ventilation etc.

3. **Welfare – general provisions**

This defines the facilities that are necessary and should be provided at the workplace and availed to employees. It covers adequate supply of drinking water; washing facilities, sitting facilities and First Aid - First aid stations with supplies and equipment; the expiration dates of supplies checked monthly; expired supplies discarded; trained first aid personnel; Injuries promptly and properly reported.

4. **Health, safety and welfare – special provisions**

   Employers are expected to exercise caution upon dealing with employees susceptible to injury or exposure to the risk of ill health. Precautions should be taken to prevent injury or ill health.

**PROHIBITIONS**

Prohibited at the workplace: -

- Firearms, weapons, drugs or alcohol; there should be no use of alcoholic beverages or controlled substances.
- Fighting at the workplace which is not allowed
- All employees should also refrain from Hazard Communications for example; calls, letters, texts or emails with inflammatory messages.
- Employees should be equipped with proper dress code; for example work shoes worn, Lockout/tag out procedures, electrical Safety details and other not listed but known Hazards & Controls for example proper use of the microwave etc

All employees should ensure they are equipped with information on job safety measures; Emergency Contacts - emergency plan, evacuation procedures, meeting places.

**CLASSIFICATION OF OSH HAZARDS AND MITIGATION IN Hazard control technologies ltd**

Types of health hazards that could face the employee include and not limited to;

a) **Ergonomics;** Some of the common ergonomic risks result from sitting for long hours on improperly adjusted chairs thus causing Musculoskeletal disorders, repetitive, forceful, or prolonged exertions of the hands while using computers and eye problems from long staring at the computer screens.

b) **Injuries**; these are slips, trips, and falls resulting from wet floors and slippery finish to floors. These are day-to-day risk hazards. Some employees further exposed to injuries from falling files, boxes, cabinets etc. All employees are also exposed to cuts from various desk/stationery items.

c) **Respiratory diseases;** Employees are exposed to respiratory diseases that may result from transmissions due to overcrowding or poorly ventilated rooms.

d) **Environmental Hazards;** Hazard control technologies LTD is located in the Business District where there are a variety of hazards. These include noise from vehicles and people and smells from vehicle wastes and toxic gas.

In addition to these other risks, others may include different severe weather conditions such as lightning, earthquakes and flood, bomb threats, violent employees or site shooters.

**Risk Management of identified risks**

Risk management is about bringing the risk to acceptable levels (Acceptable risk).

To manage this, the Hazard Control Technologies LTD OSH inspection team should:

a) Inspect the workplace using a workplace inspection checklist and conduct a walk-through survey;

b) Review the accident, incident and ill-health records;

c) Ask the employees on the hazards they encounter

d) Develop hazard / risk register

**Risk Mitigating Measures**

a) **Cleanliness**; The working areas should be kept clean. Sanitary facilities should be clean with good drainage. The kitchen area should be kept clean at all times.

b) **Ventilation**; Each workstation should have circulation of fresh air with adequate ventilation. Windows should be adequate in every room to ensure free circulation of air. Additionally, employees should not be overcrowded in a room where there is risk of disease transmission through contact or respiratory route.

c) **Lighting**; There should be sufficient and suitable lighting whether natural or artificial in every part of the workplace.

d) **Drainage of Floors;** Floors should be drained to ensure they are dry to avoid slips and falls. Floors should be easily washable.

e) **Sanitary convenience**; There should be a sufficient number of clean sanitary facilities with sufficient lighting for both sexes. Sanitary facilities should have hand washing areas with running water, soap/ detergent and drying material.

f) **Fire Prevention;** All workrooms should be provided with appropriate firefighting appliances and adequate means of escape, in case of fire. There should be enough fire extinguishers and training sessions and fire drills held consistently to sensitize staff on fast responses. There should also be fire safety signs and labels displayed according to the facility fire risk.

g) **First Aid Kit;** Available should be a first aid facility for staff also ensuring adequate numbers of trained first aiders.

h) **Equipment;** Appropriate consideration shall be made for equipment lay out within the facility. A full list of current and anticipated equipment and their placement shall be provided and considered in the facility design or redesign. Competent people shall set up workstations ergonomically.

i) **Training and Exercises;** Training should be held on how to avoid musculoskeletal pain or injury from repetitive or physically awkward tasks. Staff shall learn safe lifting techniques, especially for staff working in the registry that have to lift boxes often. The management has in place wellness programs that include physical wellness.

j) **Maintenance;** There should be frequent maintenance for the equipment installed e.g fire extinguishers, in order to ensure the equipment is working properly especially in time when it may be needed.

**Osh reporting and documentation**

Hazard control technologies LTD OSH committee secretary in the company shall establish and maintain records of OSH events in the facility. The OSH documents shall include the following reports and an up-to-date register on accident reporting, dangerous occurrences, incidence/ near misses, notifiable diseases etc

**Communication of the policy**

The policy is communicated at three different stages:-

(a) Upon entry of a new employee – through induction

(b) During periodic departmental meetings with a set aside agenda on OSHA

(c) During continuous training on safe work practices and procedures

**Employee Responsibilities**

(a) attend training sessions and learn

(b) Read labels and material safety data sheets

(c) Know where to find the safety material

(d) Know correct emergency procedures

(e) Use safe work habits

**EXPECTED OUTCOME OF OSHA COMPLIANCE ON THE COMPANY**

(a) Improvement in absence management resulting from lower absence

(b) Cost on ensuring a healthy workforce reduced e.g. medical expenses

(c) More productive employees resulting from high motivation and less stress

(d) Good relations among employees as well as with employer for showing value

(e) Emotional and physical security provided to employees.

(f) Reduced injury –related lost working hours

(g) Employee wellness is managed

(h) Compliance with the law and government regulatory approvals confirmed.

## OCCUPATIONAL SAFETY AND HEALTH (OSH) POLICY STATEMENT

At **Hazard control technologies LTD,** we recognize our responsibility to provide and maintain a safe and healthy work environment for our employees, clients, visitors and other stakeholders. We are fully committed to upholding the highest standards of occupational safety and health in all our operations, in accordance with national legislation and best industry practices.

**Hazard control technologies LTD OSHA policy** assures that the company has employed an effective accident and illness prevention program that involves all its employees in the effort to eliminate workplace hazards.

To fulfill this commitment, Hazard control technologies LTD will:

1. **Ensure Compliance:**
   Adhere to all applicable occupational safety and health laws, regulations, and guidelines relevant to our business operations.
2. **Promote a Safety Culture:**
   Foster a workplace culture where safety and health are integral to all activities and decision-making processes.
3. **Prevent Accidents and Illnesses:**
   Identify potential hazards, assess risks, and implement effective controls to prevent workplace injuries, accidents, and occupational illnesses.
4. **Engage and Educate Employees:**
   Provide regular safety training, information, and resources to ensure that all staff understand their responsibilities and can work safely and effectively.
5. **Encourage Participation:**
   Involve all employees in health and safety initiatives and encourage open communication regarding safety concerns and suggestions.
6. **Support Employee Well-being:**
   Promote initiatives that support not only physical safety but also mental and emotional well-being.
7. **Monitor and Improve:**
   Continuously evaluate and improve our safety policies, systems, and performance through audits, inspections, and feedback mechanisms.

All managers and supervisors are accountable for the implementation of this policy within their respective areas of responsibility. Every employee, in turn, is expected to take reasonable care of their own health and safety, as well as that of others who may be affected by their actions.

This policy is reviewed annually and whenever significant changes occur in the company's operations or legal requirements.
